

CANTHARONE INSTRUCTIONS

Cantharone is a solution used in the treatment of molluscum and other warts. The treatment area should be left covered for _____ hours. *

Remove the bandage and gently wash the area with soap and water.

Within 4-12 hours a blister should form at the treatment site. Do not open the blister. It will dry up.

*If stinging, burning or tenderness should occur, please remove the bandage as soon as the symptoms occur and follow directions below.

INSTRUCTIONS FOR CARE (twice daily until healed)

1. Wash your hands with soap and water.
2. Cleanse the blister site with 1/2 peroxide and 1/2 water, then gently pat dry.
3. Apply antibiotic ointment (over the counter Bacitracin ointment).
4. A Band-Aid may be applied over the blister until it is dry.
5. Call the office if signs of infection occur, (redness, swelling, heat, increased pain or yellow discharge).
